

Energy Policy

The Energy Policy of IndianOil Adani Ventures Limited is centred around efficient use of energy in all our activities in a sustainable manner.

We are committed to meeting applicable compliance requirements and achieve continual improvement of our Energy Management System and performance.

Towards this commitment IAVL shall endeavour to:

- Measure, monitor and optimise energy consumption by adopting appropriate energy conservation measures without affecting operations and product quality.
- Use of sustainable techniques adapted for energy optimisation and minimising its effect on the environment.
- Set and reviewing objectives of energy targets to deliver improvement in energy performance.
- Ensure availability of information and necessary resources to achieve the objectives and targets where practicable.
- Comply with all the applicable legal and other requirements.
- Support purchase of energy efficient products, services and design for energy performance improvement.
